## Origin Hosting Management

## FTP Permissions

There may be multiple projects running in parallel in the same Tencent Cloud account. To prevent information leakage between projects, for users who adopt FTP hosting source, Tencent Cloud can assign appropriate hosting source account management solutions with different permission to specific project and directory.

**Note:** Currently, FTP hosting source is no longer available to new users. Existing users can continue to use it.

Log in to [CDN Console](#), select Hosted Sources menu on the left, and then select Hosting Source Access Management. You will be directed to the function page for hosting source access management:

CDN China

### Hosting source access management

Search by keywords

1. hosting origin access management account is by default the Cloud Services account; you can [click here](#) to check your Tencent Cloud account and password

2. Tencent Cloud CDN supports splitting management access for hosting origin content; you can create sub-accounts to split access management for hosting origin projects that already have access; one sub-account can only correspond to one project

[Add sub-account](#)

Account	Account Type	Project name	Last modified	Last modifier	Note	Operation
						<a href="#">Reset Password</a> <a href="#">Delete</a>

## Create a Sub-account

Click + Add a Sub-account button to create a new FTP sub-account:

**Add sub-account** ×

Project\*  
Default

Business Type\*  
FTP

FTP upload address  
ftp://ftp.cdn.qcloud.com

Account\*

Specify the folder to be authorized.  
ftp://ftp.cdn.qcloud.com

- Enter the existed directory you need to authorize. If it's left blank, this project will get authorization for all permissions
- Up to 32 characters for the directory.
- Case sensitive

Password\*  
X

Confirm password\*  
X

Note

OK

Cancel

You can set the account info, password, authorized projects, and authorized directories of a sub-account.

Note:

- The account name is defined by the user with the cloud service account as its prefix number;
- You may not specify the authorized directories. In this case, you have granted all the permission to specified projects;
- The authorized directory must be an FTP directory that already exists; otherwise the sub-account cannot be added.

## Change Sub-account Password

In the sub-account list, click Reset Password on the right side of the sub-account to change its login password:

**Reset Password** ×

Account name
